Restriction summary

This Usage Guideline restricts the MT 942 (November 2013) base message.

Restriction Type	See page
Reduce Multiplicity	n.a.
Ignore	n.a.
Text rules	7, 15, 18
Conditional rules	7
Fixed values	10, 10
Comments	8, 8, 15, 17
Annotations	n.a.
Extensions	n.a.
Synonyms	n.a.

Message Types

The following table lists all message types defined in this book.

For each message type, there is a short description, an indicator whether the message type requires authentication (Y/N), the maximum message length on input (2,000 or 10,000 characters), whether the use of the message requires registration with SWIFT for use in a message user group (Y) or not (N) and whether value date ordering (VDO) can be requested for the message (Y/N). Value date ordering criteria are described in the *Standards MT General Information*.

MT	MT Name	Purpose	Authen.	Max. Length	MUG	VDO
942	Interim Transaction Report	Provides balance and transaction details of an account, for a specified period of time, to a financial institution on behalf of the account owner	N	2000	N	N

MT 942 Interim Transaction Report

Note *As this message may require the implementation of special procedures, its use is governed by bilateral agreements between correspondents.*

MT 942 Scope

This message type is:

- sent by an account servicing institution (reporting institution) to a financial institution (concentrating institution) which has been authorised by the account owner to receive it.
- sent by an account servicing institution (reporting institution) to a financial institution account owner.
- sent by an account servicing institution to a non-financial institution account owner or party authorised by the account owner to receive the information.
- sent by a concentrating institution to a non-financial institution account owner or party authorised by the account owner to receive the information.

It is used to transmit detailed and/or summary information about entries debited or credited to the account since:

- the last statement or balance report, or
- the last interim transaction report (sent in the period since the last statement or balance report).

For use of messages in the corporate to bank environment, see the MT message implementation guide for corporate customers available on www.swift.com.

MT 942 Format Specifications

MT 942 Interim Transaction Report

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1
M	25	Account Identification	35x	2

O	90D	Number and Sum of Entries	5n3!a15d	9

Status	Tag	Field Name	Content/Options	No.
O	90C	Number and Sum of Entries	5n3!a15d	10
M	86	Information to Account Owner	6*65x	11
M = Mandatory, O = Optional				

MT 942 Network Validated Rules

- C1** The first two characters of the three character currency code in fields 34F, 90D, and 90C must be the same (Error code(s): C27).
- C2** When only one field 34F is present, the second subfield must not be used. When both fields 34F are present, subfield 2 of the first 34F must contain the value 'D', and subfield 2 of the second 34F must contain the value 'C' (Error code(s): C23).

MT 942 Usage Rules

- This message should only be used if the account owner(s) has (have) authorised the financial institutions to transmit such information. It must be used according to agreed criteria.
- Financial institutions which receive this message must not use the information for their own purposes.
- It is important that amounts be identical to those of the original transaction. For identification purposes, deductions, for example, charges above and beyond those previously accounted for, shall appear separately with the appropriate code. They shall use the same TRN as the original transaction, or other suitable reference if no TRN is available.
- Since the length of a SWIFT message is restricted to the maximum input message length, several messages may be required to accommodate all the information for one statement.
- Depending on financial practice and the agreement(s) between the account servicing institution and the account owner, the items reported in this message may or may not be considered as booked or available funds.

MT 942 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

USAGE RULES

The TRN may be the same or different for the separate messages of an interim report consisting of several messages.

USAGE GUIDELINES**Additional rule(s) for this field**

- on mt/2013.November/942/20

1. **HSBC_TransactionReferenceNumber:**

If transmission channel is not SWIFT FIN Then
Statement ID format :AIX9999999991111
where
- 'AI' - Prefix
- 'X' - day of the month starting from 1-10, A-Z
- '999999999' - unique number assigned to each MT940 output file
- '1111' - sequence number for each reported account in the MT940 file starting with 0001.

Else If transmission channel is SWIFT FIN then,
Statement ID format :YMMDDXXXXX
where 'YMMDD' - Date in YMMDD format 'XXXXX' - Unique transaction ID

2. Field 25: Account Identification**FORMAT**

35x

(Account)

PRESENCE

Mandatory

DEFINITION

This field identifies the account for which the interim transaction report is sent.

USAGE GUIDELINES**Additional rule(s) for this field**

- on mt/2013.November/942/25

1. **HSBC_AccountIdentification:**

HSBC account without '-' which the statement is reported.
For ASP countries, 12 digits account number will be reported.
For US, 9 digits account number will be reported.
For MX, 10 digits account number will be reported.

If

ASP country

Then

12 digit account number will be reported

Else

If country is United States then 9 digit account number will be reported.

Else if country is Mexico then 10 digit account number will be reported

- **Comment:**

HSBC account without '-' which the statement is reported.

Note : The account number used will follow the account structure

3. Field 28C: Statement Number/Sequence Number

FORMAT

Option C 5!n[/5!n] (Statement Number)(Sequence Number)

PRESENCE

Mandatory

DEFINITION

This field contains the sequential number of the statement, optionally followed by the sequence number of the message within that statement when more than one message is sent for the statement.

USAGE RULES

The statement number should be reset to 1 on 1 January of each year.

If used, the sequence number always starts with 1. When several messages are sent to convey information about a single statement, the first message must contain '1' in Sequence Number.

The sequence number must be incremented by one for each additional message.

Both the statement number and sequence number enable the Receiver to put the different messages into sequence and thus form the complete statement.

USAGE GUIDELINES

Additional rule(s) for this field

- **Comment:**

For the HSBC specific format, the statement ID will always be padded with 5 digits
ie. :28C:00235/0001

EXAMPLES

The first message of a statement is : 28C:235/1

The second message is : 28C:235/2

and so on.

4. Field 34F: Debit/(Debit and Credit) Floor Limit Indicator

FORMAT

Option F 3!a[1!a]15d (Currency)(D/C Mark)(Amount)

PRESENCE

Mandatory

DEFINITION

This field specifies the minimum value (transaction amount) reported in the message.

CODES

When D/C Mark is present, it must contain the following code (Error code(s): T51):

D	Debit	Debit floor limit.
---	-------	--------------------

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03, T40, T43).

USAGE RULES

When field 34F Credit Floor Limit Indicator is absent, the floor limit applies to both debit and credit amounts. When different limits apply, field 34F Credit Floor Limit Indicator must be present.

5. Field 34F: Credit Floor Limit Indicator

FORMAT

Option F 3!a[1!a]15d (Currency)(D/C Mark)(Amount)

PRESENCE

Optional

DEFINITION

This field specifies the minimum credit value (transaction amount) reported in the message.

CODES

D/C Mark must contain the following code (Error code(s): T51):

C	Credit	Credit floor limit.
---	--------	---------------------

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03, T40, T43).

USAGE RULES

When different limits apply, this field 34F must be present, with a credit indicator ('C').

6. Field 13D: Date/Time Indication

FORMAT

Option D 6!n4!n1!x4!n (Date)(Time)(Sign)(Offset)

PRESENCE

Mandatory

DEFINITION

This field indicates the date, time and time zone at which the report was created.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Time must be a valid time expressed as HHMM (Error code(s): T38).

Sign is either "+" or "-" (Error code(s): T15).

Time offset is expressed as 'HHMM', where the hour component, that is, 'HH', must be in the range of 00 through 13, and the minute component, that is, 'MM' must be in the range of 00 through 59. Any 'HH' or 'MM' component outside of these range checks will be disallowed (Error code(s): T16).

USAGE RULES

The time zone in which Time is expressed is to be identified by means of the offset against the UTC (Coordinated Universal Time - ISO 8601).

USAGE GUIDELINES

Additional rule(s) for this field

- For subfield Sign
 - **Single value:** +
- For subfield Offset
 - **Single value:** 0000

EXAMPLES

If a financial institution in New Zealand creates an MT 942 at 15.15 PM local time on 08 January 2009, Date/Time Indication field would be completed as follows:

:13D:0901081515+1300

whereby 090108 is the date, 1515 is the local time in New Zealand and +1300 is the offset of local New Zealand time in January against UTC.

Offsets of local time zones against UTC are published on www.swift.com in the *BIC Directory, General Country Information*.

7. Field 61: Statement Line

FORMAT

6!n4!n2a1!a15d1!a3!c16x//16x (Value Date)(Entry Date)(Debit/Credit Mark)(Funds Code)(Amount)(Transaction Type)(Identification Code)
 [34x] (Reference for the Account Owner)(Reference of the Account Servicing Institution)
 (Supplementary Details)

PRESENCE

Mandatory

DEFINITION

This field contains the details of each transaction.

CODES

In subfield 6, when Transaction Type is 'N' or 'F', Identification Code may contain one of the following codes:

BNK	Securities Related Item - Bank Fees
BOE	Bill of Exchange
BRF	Brokerage Fee
CAR	Securities Related Item - Corporate Ac- tions Related (should only be used when no specific corporate action event code is available)
CAS	Securities Related Item - Cash in Lieu
CHG	Charges and Other Expenses
CHK	Cheques
CLR	Cash Letters/Cheques Remittance
CMI	Cash Management Item - No Detail
CMN	Cash Management Item - Notional Pool- ing
CMP	Compensation Claims
CMS	Cash Management Item - Sweeping

CMT	Cash Management Item - Topping	
CMZ	Cash Management Item - Zero Balancing	
COL	Collections (used when entering a prin- cipal amount)	
COM	Commission	
CPN	Coupons	Securities Related Item - Coupon Payments.
DCR	Documentary Credit (used when entering a principal amount)	
DDT	Direct Debit Item	
DIS	Securities Related Item - Gains Disburse- ment	
DIV	Dividends	Securities Related Item - Dividends.
EQA	Equivalent Amount	
EXT	Securities Related Item - External Trans- fer for Own Account	
FEX	Foreign Exchange	
INT	Interest	Interest related amount.
LBX	Lock Box	
LDP	Loan Deposit	
MAR	Securities Related Item - Margin Pay- ments/Receipts	
MAT	Securities Related Item - Maturity	
MGT	Management fees	Securities Related Item - Management Fees.
MSC	Miscellaneous	
NWI	Securities Related Item - New Issues Distribution	
ODC	Overdraft Charge	
OPT	Securities Related Item - Options	
PCH	Purchase	Securities Related Item - Purchase (including STIF and Time de- posits).
POP	Securities Related Item - Pair-off Pro- ceeds	
PRN	Securities Related Item - Principal Pay- down/Pay-up	

REC	Reclaim	Securities Related Item - Tax Reclaim.
RED	Securities Related Item - Redemption/Withdrawal	
RIG	Securities Related Item - Rights	
RTI	Returned Item	
SAL	Sale	Securities Related Item - Sale (including STIF and Time deposits).
SEC	Securities	Securities (used when entering a principal amount).
SLE	Securities Related Item - Securities Lending Related	
STO	Standing Order	
STP	Securities Related Item - Stamp Duty	
SUB	Securities Related Item - Subscription	
SWP	Securities Related Item - SWAP Payment	
TAX	Securities Related Item - Withholding Tax Payment	
TCK	Travellers Cheques	
TCM	Securities Related Item - Tripartite Collateral Management	
TRA	Securities Related Item - Internal Transfer for Own Account	
TRF	Transfer	
TRN	Securities Related Item - Transaction Fee	
UWC	Securities Related Item - Underwriting Commission	
VDA	Value Date Adjustment (used with an entry made to withdraw an incorrectly dated entry - it will be followed by the correct entry with the relevant code)	
WAR	Securities Related Item - Warrant	

CODES

Subfield 3, Debit/Credit Mark must contain one of the following codes (Error code(s): T51):

C	Credit
D	Debit
RC	Reversal of Credit (debit entry)
RD	Reversal of Debit (credit entry)

CODES

In subfield 6, Transaction Type must contain one of the following codes (Error code(s): T53):

S	SWIFT transfer	For entries related to SWIFT transfer instructions and subsequent charge messages.
N	Non-SWIFT transfer	For entries related to payment and transfer instructions, including related charges messages, not sent through SWIFT or where an alpha description is preferred.

CODES

In subfield 6, when Transaction Type is 'S', Identification Code will indicate the message type of the SWIFT message causing the entry (for debit entries) or the message type of the SWIFT message used to advise the account owner (for credit entries). It must be a number (format 3!n) in the range 100-999 .

NETWORK VALIDATED RULES

Subfield 1, **Value Date**, must be a valid date expressed as YYMMDD (Error code(s): T50).

The SWIFT System validates subfield 2, **Entry Date** (Date in reduced ISO form), using current System Year (Error code(s): T50).

The integer part of subfield 5, Amount, must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length (Error code(s): T40, T43).

USAGE RULES

This field may be repeated within the constraints of the maximum input message length.

'Original' advice for charges, that is, the first time the account owner is informed of a charge, must be identified in subfield 6, with the **Transaction Type** 'F' and the **Identification Code** 'CHG'.

The following rules apply to subfield 7, **Reference for the Account Owner**:

- At least one valid character other than a blank must be present.
- For debit entries, the purpose of this subfield is to identify, to the account owner, the instruction which caused the debit. Therefore, the content of this subfield is the field 20 Sender's Transaction Reference Number (or its equivalent) of the original instruction.
- Credit entries may be the result of one of the following situations:
 1. The account servicing institution is identifying, to the account owner the receipt of funds for its account as a result of a related transaction. In this case, the content of subfield 7, Reference for the Account Owner is the reference for the beneficiary (for example, field 21 Related Reference) of the related transaction.
 2. The account servicing institution has issued a payment instruction to the account owner and the credit identified in this subfield is for that payment. The content of subfield 7, Reference for the Account Owner is the field 20 Transaction Reference Number (or its equivalent) of the payment instruction issued by the account servicing institution.

- If no reference is available for this subfield, the code NONREF shall be used. The account servicing institution must then supply, in subfield 9, **Supplementary Details**, what it considers to be the best alternative information.
- This reference must be quoted in all cases when available. In cases where a transaction passes through several financial institutions, the original reference must always be forwarded.
- This reference must always be quoted against any charges or fees debited by the account servicing institution.
- Debits against standing instructions must show the reference of the standing instruction.
- In cases where a mutually agreed alternative reference exists (for example, in foreign exchange or money market transactions), this reference should then be used.
- If the statement entry concerns a cheque, the cheque number should be indicated in this subfield.

The following rules apply to subfield 8, **Reference of the Account Servicing Institution**:

- The content of this subfield is the account servicing institution's own reference for the transaction.
- When the transaction has been initiated by the account servicing institution, this reference may be identical to subfield 7, Reference for the Account Owner. If this is the case, Reference of the Account Servicing Institution, subfield 8 may be omitted.

The following rules apply to subfield 9, **Supplementary Details**:

- When no reference for the account owner is available, that is, subfield 7, Reference for the Account Owner, contains NONREF, the account servicing institution should provide the best available alternative information in this subfield.
- Supplementary details may be provided when an advice has not been sent for a transaction, or to provide additional information to facilitate reconciliation.
- This field may include ERI, as specified in the chapter entitled "Euro - Impact on SWIFT Message Standards".
- This field may contain ERI to transport dual currencies, as explained in the chapter "Euro - Impact on Category 9 Message Standards".
- In order to comply with the EC-directive on cross border credit transfers, the optional code word EXCH may be used to transport an exchange rate. In line with ERI, the code word EXCH is placed between slashes, followed by the exchange rate, format 12d, and terminated with another slash.

USAGE GUIDELINES

Additional rule(s) for this field

- **Comment:**
The sample provide does not contain the fund code. HSBC bank statement for charges will be

:61:0901230122CD3500,25NCHK304955//4958843
- For subfield Identification Code
 - on mt/2013.November/942/Sequence/61/61/Identification_Code
 - 1. HSBC_IdentificationCode:

Additional codes:
 SDD - Sepa Direct Debit transfer
 ECK - Eurocheques
 FPS - UK Faster payment
 SCT - Sepa Direct Credit transfer
 ACH - UK BACS
 PAY - Incoming money transfer (applicable to UK only)

EXAMPLES

(1) :61:0901230122C3500,25FCHK304955//4958843

(2) :61:0901230122C3500,25FCHK304955//4958843ADDITIONAL INFORMATION

8. Field 86: Information to Account Owner**FORMAT**

6*65x

(Narrative)

PRESENCE

Optional

DEFINITION

This field contains additional information about the transaction detailed in the preceding statement line which is to be passed on to the account owner.

USAGE RULES

This field may contain ERI to transport dual currencies, as explained in the chapter 'Euro - Impact on Category 9 Message Standards'.

Since the charges field in the customer transfers is repetitive, it may be necessary to report more than one charges amount in the resulting statement. In this case, it is allowed to repeat the code word CHGS before the code word OCMT. The order in which the charges are specified is the same as in the customer transfers, that is, the order in which the charges have been taken during the transaction. So, the last appearance of the code word CHGS always specifies the charges (if any) of the account servicing institution.

In order to comply with the EC-directive on cross border credit transfers, the optional code word EXCH may be used to transport an exchange rate. In line with ERI, the code word EXCH is placed between slashes, followed by the exchange rate, format 12d, and terminated with another slash. The code may be repeated if the account servicing institution wants to report an exchange rate that it applied, in addition to the exchange rate received in the instruction. The order in which the exchange rates are specified is the same as the order in which the rates have been applied during the transaction. So, the last appearance of the code word EXCH always specifies the rate applied by the account servicing institution.

An ordering party is identified with the preceding code /ORDP/. The information following this code is copied from field 50a of the customer payment order, or field 52a (sender if field 52a is not present) of the financial institution transfer. The code should be used at the beginning of a line.

In case of a debit item, a beneficiary party may be identified with the preceding code /BENM/. The information following this code is copied from field 59a of the customer payment order, or field 58a of the financial institution transfer. The code should be used at the beginning of a line.

In case remittance information from field 70 of the payment instruction is to be included in this field, it should be preceded by the code /REMI/.

In case the information in field 72 of the payment instruction is intended for the account owner, it should be copied into field 86 as it is. Codes used in field 72 of the payment instruction have therefore the same meaning in field 86 of the statement. If only free text is used in field 72, it is to be copied as it is since a code in field 86 will not add any value.

USAGE GUIDELINES

Additional rule(s) for this field

- **Comment:**

Information to Account Owner is populated with UNSTRUCTURED information of Transaction Description downloaded from the Bank. The content depends on the nature of the underlying transaction/practice of the country

9. Field 90D: Number and Sum of Entries

FORMAT

Option D 5n3!a15d (Number)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field indicates the total number and amount of debit entries.

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03, T40, T43).

10. Field 90C: Number and Sum of Entries

FORMAT

Option C 5n3!a15d (Number)(Currency)(Amount)

PRESENCE

Optional

DEFINITION

This field indicates the total number and amount of credit entries.

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03, T40, T43).

11. Field 86: Information to Account Owner

FORMAT

6*65x

(Narrative)

PRESENCE

Mandatory

DEFINITION

This field contains additional information about the message as a whole which is to be passed to the account owner.

USAGE GUIDELINES

Additional rule(s) for this field

- on mt/2013.November/942/86

1. HSBC_InformationToAccountOwner:

The format of the field should be:

Line 1:

/OSDR/4!a2!a2!c[3!c]

Where a SWIFT BIC (4!a2!a2!c[3!c]) is the Institution Swift Address of the account being reported.

Line 2:

BAL PLGC15d/CLGC15d/CAVC15d

Where PLGC stands for Posted Ledger Amount (followed by max 15 decimals), CLGC for Current Ledger Amount and CAVC for Available balance

MT 942 Examples

Example 1: Report

Narrative

Merita Bank, Helsinki, in response to an MT 920 Request Message (reference 5678), sends an MT 942 to Midland Bank, London, for account number 123-45678 of Smythe Publications, for 26 June 2009, as of 12:00 Noon.

Debit Floor Limit: euro 100,000

Credit Floor Limit: euro 50,000

Transaction Details:

(1) Value Date: 26 June 2009 Debit: EUR 120,000
Transaction Type: Collections
Reference for the Account Owner: ABCD
Merita Bank's Reference: 12345

(2) Value Date: 26 June 2009 Credit: EUR 55,000
 Transaction Type: Foreign Exchange
 Reference for the Account Owner: 99485
 Merita Bank's Reference: 678922

Total Debits: 9 euro 210,000
 Total Credits: 87 euro 385,700

Example 2: Concentrating Institution

Narrative

A corporate customer owns an account with its local bank and also owns accounts with 4 different banks outside its own country. The corporate customer asks its local bank to receive report messages from the 4 international banks on its behalf. The local bank acts as a concentrating institution, receiving the report messages and passing them on to the corporate customer.
