Usage Guideline Description

HSBC_pain.001.001.03_HighValuePayment_India ([link](#))

The Reserve Bank of India's Real Time Gross Settlement (RTGS) system is a high value, real-time payment system that facilitates instantaneous and irrevocable payments. Under RTGS, the beneficiary bank has two hour turnaround times to either credit the Beneficiary's account or return the proceeds to the Remitting Bank. RTGS transactions have a minimum amount restriction of INR 200,000. RTGS works on a single debit – single credit mechanism. NEFT (National Electronic Funds Transfer) is the retail, domestic electronic payment system in India. Using NEFT, a remitter can provide instructions to his bank to transfer funds to a beneficiary in any of the 50,000+ bank branches currently enabled on NEFT. NEFT works on a single debit – single credit mechanism unlike other low value systems. NEFT works on a batch mode, with 11 settlement cycles everyweekday (every hour 9am to 7pm) and 5 settlement cycles on Saturday (every hour 9am to 1pm).

Bank codes used to identify beneficiary banks in India for domestic electronic payments (RTGS / NEFT) are called the Indian Financial System Code (IFSC) which consists of 11 alpha numeric characters. This is mandatory for RTGS and NEFT.

Foreign currency remittances in India are regulated and are governed by the Foreign Exchange Management Act (FEMA). Offline documentation needs to be submitted to the bank in order to process outward remittance transactions. Currently Outward and Inward remittances are regulated as per the FEMA guidelines. There are also specific guidelines on ensuring adherence with KYC norms for cross-border transactions as well. Details of the various guidelines with respect to FEMA are available on the RBI website. (www.rbi.org.in)

This section details the requirements for creating an Urgent payment from an Indian domiciled bank account. It highlights the following:

- any XML fields that are now mandatory to initiate this type of transaction,
- any specific codes that need to be quoted,
- any fields that will be truncated due to the local in-country format.

Outline

The HSBC_pain.001.001.03_HighValuePayment_India message is composed of 2 building blocks

a - Group Header

Set of characteristics shared by all individual transactions included in the message.

b - Payment Information

Set of characteristics that applies to the debit side of the payment transactions included in the credit transfer initiation.

About this document

Legend

Abbreviation	Term	Description
X	Excluded	An optional field or element must not be populated.
I	Ignored	A field or element could be populated but is ignored by the receiver.
[x..y]	Multiplicity	A field or element multiplicity has changed.
FV	Fixed Value	A field or element must contain a given value.
T/C	Type / Code Change	A user-defined datatype replaces an existing simple datatype.
A	Element Added	A field or element has been added.

Header	Description
Index	Element reference
LvL	Element nesting in tree hierarchy
Name	Element name
XML Tag	Element XML tag
Mult	Element multiplicity
Type / Code	Element formatting
Rest	Restriction type
Additional details	Other restriction specifics

Type/Code Notation	Describes the Element	Examples
text{m,M}	minimum (m) and maximum (M) length	text{1,35}
text{L}	maximum (L) length, minimum length is 0	test{10}
m <= decimal <= M	minimum (m) and maximum (M) values	0.01 <= decimal <= 9999.99
fd = F, td = T	maximum fractional (F) and total (T) number of digits	fd = 2, td = 11
<<regular expression>>	regular expression pattern	[A-Z]{6,6}([A-Z0-9]{3,3}){0,1}

2.70	3	Ultimate Debtor	<UltmtDbtr>	[0..1]			Rule "Mutually Exclusive": For each [CustomerCreditTransferInitiationV03], the following elements are mutually exclusive: [PaymentInformation/UltimateDebtor] , [PaymentInformation/CreditTransferTransactionInformation/UltimateDebtor] and all may be absent ----- Conditional Rule "HSBC_OnBehalf Of": This is a cross-element rule.It is Mandatory to provide the name and address of the ultimate debtor if a priority payment is being made on behalf of someone apart from the account holder. The address should include, as a minimum, the city or town name; the state or county; and the country. If The payment is being made on behalf of someone apart from the account holder Then The Ultimate Debtor block <UltmtDbtr>should be used to supply the name and address of the ultimate debtor Else The debtor <Dbtr> block should be used to supply the name and address of the ultimate debtor ----- Comment: The Ultimate Debtor Name and Address fields will be available for customers who wish to make payments on behalf of other than the account holder. Customers can use the Ultimate Debtor block instead of the Debtor block to provide this information, if preferred. Note: For address fields our recommendation should be to use the structured fields where available, and that in all cases the address should contain at least the town or city, the state or country sub-entity (where applicable) and the country. Validation Rule: If Ultimate Debtor Name is provided, Ultimate Debtor Address must be provided as well. Likewise, if Ultimate Debtor Address is provided, Ultimate Debtor name must be present.
